SNEH PRAJAPATI
CYBER SECURITY & WEB DESINING

PROFILE

Detail-oriented professional with expertise in Web Designing and Cyber Security. Proficient in creating user-friendly websites using HTML, CSS, and JavaScript, while implementing security measures to protect sensitive data. Experienced with design tools like Adobe Photoshop and Figma, and skilled in monitoring network traffic and conducting vulnerability assessments. Committed to staying updated with the latest trends to deliver secure web solutions

COLLEGE PROJECT

·Hotel Management System   JAN-2024 - MAR-2024

Technologies: Python, SQLite

- Designed and developed a command-line-based hotel management system.
- Modules: Customer registration, room booking, check-in/check-out, billing, and reports.
- Implemented data storage using SQLite and modular Python code.
- Features include: real-time room availability, automated billing, and admin reports.
- Outcome: Improved understanding of OOP, database integration, and real-world software architecture.

·Sneh Event Management System (Frontend Only)   APRIL 2025

Technologies: ASP.NET MVC, HTML, CSS

- Created the full frontend layout for an event management system using ASP.NET MVC.
- Designed interactive and animated pages for Home, About Us, Projects, and Contact Us.
- Focused on responsive design with embedded CSS and a modern UI/UX approach.
